New students get lost between course reserves, bookstore rentals, and online lending without staff hand-holding.

Answering the same simple questions over and over eats into time librarians could spend on real research help.

Most questions — hours, laptop checkout, “do you have this book?” — are simple enough to self-serve.

Older library web pages are hard to navigate and inaccessible, and pulling data from databases needs API skills few have.

Potential Impact

1. Improved Student Access and Equity
2. Enhanced Student Success
3. Improved Accessibility
4. Scalable and Cost-Effective Innovation
5. Greater Efficiency for Library Staff
