Our Project:

Sonoma State University: VPAT Review Procurement

Customer Pain Points

01

Time-consuming

02

Inconsistent Results

03

Expensive Tools

Model Selection

Why the cheapest one

It keeps up. 84.9 quality — 9 points behind the best of all 56.

It agrees. Same verdict as Sonnet 4.5 on the document we demo.

It scales. 1,270 reviews per dollar, so we can run it on every purchase.

The catch

It is the lenient one — so a human signs off on every verdict.

56 models tested. One does the job for a tenth of a cent.

How we built the prompt

Define the Task:

- Prioritize rubrics

Set the category:

- Identify critical criteria
- Understand user remarks

Summary:

- Built to guide the reviewer's next steps
 - Make informed decisions alongside the rubric
- 

Our Impact

01

Time-Saving and Affordable

02

Fairness and Clarity

03

Built to Scale
